INFODAPTER
INSTRUCTIONMANUAL
for select Holden vehicles

Designed and
Engineered
in the UK.

ABOUT

The Aerpro Infodapter for GM vehicles allows vehicle information such as climate control, parking sensors and heated seats to be displayed on any aftermarket head unit with rear camera input. Extensive vehicle settings can also be adjusted from the steering wheel controls. The Infodapter also allows the use of the steering wheel controls with almost every steering wheel control compatible head unit on the market.

DIP SWITCH SETTINGS

See Fig 1.

Up = Off, Down = On

1: On = Pioneer head units. Off = All other head units

2: Setting for reverse camera. On = PAL, Off = NTSC. The default setting is Off (NTSC).

3: Resets the display settings back to default. If the display settings have been manipulated in a way that it is no longer possible to make adjustments, change the DIP switch #3 from Off to On and back. This will reset the screen settings to the factory defaults. During this procedure the screen background will change to red. While the background is red, no settings can be made.
