## CHVL02

Volvo steering wheel control interface for Volvo vehicles with CAN-Bus.

### Product Contents

- Interface
- Harness
- Instruction

### Prior to installation

Read the manual prior to installation. Technical knowledge is necessary for installation. The place of installation must be free of moisture and away from heat sources. Please ensure you use the correct tools to avoid damage to the vehicle or product.

***Aerpro can not be held responsible for the installation of this product.***

### Technical Support

Aerpro want to provide a fast and suitable resolution should you encounter any technical issues. With this in mind, when contacting Aerpro, try to provide as much Information as possible. This will speed up the process and help us to help you.

**Please use our dedicated online technical support centre: [intranet.tdj.com.au/support/](http://intranet.tdj.com.au/support/)**

1. Remove and disconnect the original head unit.
2. Connect the 12 way molex connector of the head unit patch lead (supplied separately) to the interface (Pg.2, Fig 1.)

3. Connect the opposite end of head unit patch lead to the head unit steering wheel control input on the back of the aftermarket head unit. This may be a 3.5mm jack plug or a wire input depending upon the head unit brand being fitted. Please see the head unit installation manual for further information on where to connect.

**Important Note: This step must be completed before connecting power to the interface. Failure to so do may result in no steering wheel control function.**

4. Connect the 14 way molex connector to the interface.

5. Connect the male power/speaker ISO harness (Pg.2. Fig 2.) to the female power/speaker ISO harness from the aftermarket head unit.

For aftermarket head units which do not have an ISO connector the interface uses the following wiring colours:

Wire Colour	Function
Yellow	Permanent 12V
Black	Ground
Red	12V Ignition
Orange	Illumination
Blue	Antenna Remote
Pink	Speed Pulse
Green	Park Brake
Purple/White	Reverse

Wire Colour	Function
Purple	Right Rear Speaker +
Purple/Black	Right Rear Speaker -
Green	Left Rear Speaker +
Green/Black	Left Rear Speaker -
Grey	Right Front Speaker +
Grey/Black	Right Front Speaker -
White	Left Front Speaker +
White/Black	Left Front Speaker -

6. Feed the long extension loom down through the dashboard and behind the skirting (highlighted). Bring the wire up under the passenger seat and locate the OEM amplifier

7. Disconnect the amplifier connectors and plug these into the grey and green connectors of the extension loom

8. Disconnect the vehicle display and plug in the male green vehicle display connector. Take the disconnected display lead and plug this into the female green vehicle display connector

9. Test head unit for correct operation and reassemble the dash.

## STEERING WHEEL CONTROL FUNCTIONS

---

1. Track -
